PROFESSIONAL SUMMARY

Frontend Developer building production-grade applications in React.js, Angular, Flutter, and TypeScript. Delivered scalable, component-driven UIs with Redux Toolkit state management, REST API integration, role-based access control, and responsive design. Experienced collaborating on design-to-code implementation and backend API integration across web and cross-platform mobile projects. Seeking a full-time Frontend Developer role in a fast-paced product environment.

TECHNICAL SKILLS

Languages:

HTML5, CSS3, JavaScript (ES6+), TypeScript, Dart

Frameworks & Libraries: React.js (v19), Angular, Flutter, Redux Toolkit, React Router, Axios

Tools & Platforms:

Git, GitHub, Vite, Webpack, VS Code, ESLint, Chrome DevTools, Chrome Extension APIs, Google Play Console, Netlify, Vercel

Concepts:

REST API Integration, Responsive Design, Component Architecture, State Management, Role-Based Access Control, Performance Optimization, Agile/Scrum, CRUD Operations, Authentication & Authorization, Mobile App Deployment, Cross-browser Compatibility, DOM Manipulation, Browser Behavior

PROJECTS

Library Management System

Tech Stack: React.js, Redux Toolkit, JSON Server, Axios

- Architected a full-featured Library Management System with role-based access control (Admin, Librarian, Guest) and complete CRUD operations.
- Implemented server-side pagination, real-time debounced search, multi-column sorting, and advanced filtering for efficient data retrieval.
- Managed application-wide state using Redux Toolkit across books, authors, users, and session data with clean slice-based architecture.
- Engineered optimistic UI updates with automatic rollback on API failure and custom fallback UI for graceful error handling.
- Enforced unique ISBN validation with strict separation of UI, custom hooks, and service layers for maintainable code.

Face Attendance Mobile Application

Tech Stack: Flutter, Dart, REST API

- Built a cross-platform Face Attendance app using Flutter with real-time face detection and punch-in/out tracking.
- Integrated REST APIs for face recognition, attendance data management, and real-time employee status updates.
- Implemented clean multi-screen UI with dynamic data binding — attendance records auto-update on successful punch in/out.
- Handled end-to-end Android build process including APK generation and Google Play Console deployment.

Employee Onboarding Application

Tech Stack: Flutter, Dart, ID Verification API

- Built a cross-platform Employee Onboarding app using Flutter with digital onboarding flow and government ID verification.
- Integrated third-party ID verification APIs to auto-fetch and pre-fill employee details, eliminating manual data entry.
- Implemented multi-step onboarding screens with dynamic data binding triggered by ID number input.

Adidas India E-Commerce Clone

Tech Stack: React.js v19, Vite, ESLint

- Built a fully responsive e-commerce frontend inspired by Adidas India using React v19 and Vite for optimized production builds.
- Structured project with modular reusable components and integrated ESLint for consistent code quality.
- Implemented product listing, navigation, routing, and responsive layouts deployed live to production.

Angular CRUD Application

Tech Stack: Angular, TypeScript, REST API

- Developed full CRUD functionality using Angular components, services, and TypeScript with strong type safety.
- Implemented reactive form validation, Angular Router navigation, and REST API integration via HttpClient.
- Built reusable modular components and responsive layouts following Angular best practices.

EDUCATION

B.Sc. in Electronics and Communication Science
DRBCCC Hindu College, University of Madras, Chennai, India

Graduated: May 2025

CERTIFICATIONS

- React: The Complete Guide — Udemy
- Web Development Certification — InternzLearn
- HTML5 and CSS3 — Great Learning

ADDITIONAL INFORMATION

Soft Skills: Problem Solving, Team Collaboration, Quick Learner, Attention to Detail, Communication English

Languages Known: (Professional), Tamil (Native)
