Chennai, India | Available Immediately | Open to Relocation

PROFESSIONAL SUMMARY

React.js developer who builds responsive, component-driven web applications end-to-end — component architecture, REST API integration, state management (Redux Toolkit), authentication and authorization, and automated testing — with hands-on use of React Hooks and some exposure to Next.js. Built four live applications spanning web and cross-platform mobile; most recently added debounced search, server-side pagination, and performance optimization to a 100+ record library system with role-based access control and a from-scratch Jest/RTL test suite. Looking for a Frontend Developer role or internship where I can grow with a team building modern web products.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, Dart

Frameworks & Libraries: React.js (v19) with Hooks, Next.js, Redux Toolkit, React Router, Angular, Flutter, Axios

Styling: Tailwind CSS, Bootstrap, CSS3, Responsive Web Design

Testing: Jest, React Testing Library

Tools & Platforms: Git & GitHub, Vite, Webpack, VS Code, ESLint, Netlify, Render, Google Play Console

Concepts: REST API Integration, Component Architecture, State Management, RBAC, Authentication & Authorization, CRUD Operations, Performance Optimization

PROJECTS

Library Management System (Librio)

librio-library.netlify.app | React.js, Redux Toolkit, Tailwind CSS, JSON Server, Jest, React Testing Library

- Built role-based access control for Admin, Librarian, and User tiers across 100+ book and user records, using Redux Toolkit slices to keep permissions and data flow consistent.
- Implemented debounced multi-criteria search with server-side pagination, eliminating redundant API calls on every keystroke and keeping the UI responsive on large record sets.
- Set up a Jest and React Testing Library suite from scratch in a Webpack project, resolving polyfill and Babel config issues to make unit tests reliable.

Adidas India E-Commerce Clone

adidasofficial.netlify.app | React.js v19, Tailwind CSS, Vite

- Built a fully responsive e-commerce frontend with route-based code splitting and modular, reusable components; deployed live to production on Netlify.

Face Attendance Mobile App

Flutter, Dart, REST API

- Shipped a cross-platform face-detection attendance app to Android, tested across 30 users with automatic punch-in/out record sync via REST API.

Employee Onboarding App

Flutter, Dart, Government ID Verification API

- Built a multi-step onboarding flow integrating an ID verification API that auto-fetches and prefills employee details, cutting manual data entry by roughly 30%.

INTERNSHIP

Web Development Intern

InternzLearn (Remote) | 2024

- Built 5 responsive static web pages using HTML, CSS, and JavaScript in a remote team environment, practicing DOM manipulation and event handling fundamentals that carried into later React work.

EDUCATION

B.Sc. Electronics and Communication Science

DRBCCC Hindu College, University of Madras, Chennai | CGPA: 8.56 | Graduated May 2025

CERTIFICATIONS

React: The Complete Guide (Udemy) | Web Development Certification (InternzLearn) | HTML5 and CSS3 (Great Learning)
